

**Singapore, 30th December 2020.**

**MineSec signed a commercial agreement with [NEXGO](#), a leading payment terminal and service provider.**

MineSec is excited to announce that we reached an agreement with NEXGO, a leading payment terminal and service provider. In this strategic agreement, NEXGO decides to leverage MineSec technology to implement its first-ever PCI CPoC solution. This key milestone demonstrates that MineSec's solution is delivering its promises and our partners are adopting it.

MineSec designed a unique white-label SoftPOS solution that comprises of [MineHades](#), the client SDK, and [MineZeus](#), the attestation and monitoring server. Our solution enables payment terminal providers and service providers to design and develop a PCI CPoC compliant SoftPOS under their brand.

With the mission of providing a more secured mobile accepting technology, MineSec understands well the needs and challenges of the emerging SoftPOS solution. MineSec is the 1<sup>st</sup> white-label CPoC SoftPOS solution. It is a true white-label solution designed and developed to fulfill the security and functional requirements set by PCI and card networks respectively. PCI CPoC is just the beginning, the solution will be upgraded to support software-based PIN entry for the needs in some countries as well upcoming new standard of CPoC + PIN. More information will be provided in due course.

MineSec thanks the NEXGO's team for their trust. Stay tuned for upcoming news in this space and, if you want to know more about MineSec and how we can help you streamline the launch of SoftPOS services, contact us [here](#).
